Subject: PROPOSED REVISION TO THE SECURITY POLICY MANUAL FOR SCI
CONTROL SYSTEMS

Attached are some constructive comments regarding the proposed revision to the Security Policy Manual for SCI Control Systems, Attachment to DCID 1/19.

We, as a group, recognize that this document is for user agency consumption; however, it is anticipated that the requirements will flow down to industrial participants. Therefore, our comments are primarily directed to those items that could have an affect on us.

The review was conducted on 19 March 1982 as an item of business during our regular quarterly meeting. The review was participated in by twenty-seven members of our group.
